The screenshot displays the Postman REST client interface. On the left, a sidebar shows a collection named 'Dynamic Pricing Engine' with a sub-collection 'Product APIs'. The 'GET All Products' endpoint is selected. The main panel shows the request configuration: Method 'GET', URL '[[baseUrl]] /api/products', and a 'Send' button. Below the URL bar, tabs for 'Docs', 'Params', 'Authorization', 'Headers', 'Body', 'Scripts', and 'Settings' are visible, with 'Params' currently active. A 'Query Params' table is shown with two rows: one with 'Key' and 'Value' headers, and another with 'Key' and 'Value' data. The 'Body' tab is also visible, showing a JSON response with a status of '200 OK' and a response time of '279 ms'. The JSON response is a list of two product objects. On the right, a 'New Chat' section is visible.

The screenshot displays the Postman interface for testing a REST API. The left sidebar shows the 'COLLECTIONS' panel with a tree view containing 'Dynamic Pricing Engine', 'Product APIs', 'Pricing Rule APIs', and 'Dynamic Pricing API'. The 'PUT Update Product' endpoint is selected under 'Product APIs'. The main workspace shows the request details for the 'Update Product' endpoint. The request is a PUT method to the URL 'PUT {{baseUri}} /api/products/1'. The request body is in JSON format, containing 'name': 'iPhone 16 Pro Max' and 'basePrice': 135000. The response is a 200 OK status with a response time of 18 ms and a body of 218 B. The response body is in JSON format, containing 'basePrice': 135000, 'id': 1, and 'name': 'iPhone 16 Pro Max'.
